

# Juan Navas

## Full Stack Engineer

Full Stack Engineer with 4 years of experience adding value to my customers' products, working with teams around the world.

Passionate about technology, never stop learning.

Always try to give my best.

## Work Experience

### Full Stack Developer

Freelance - Upwork

January 2022 - April 2022

- Contributed in the frontend and backend of a scheduling appointment React app. Implemented integrations with Google Calendar and Stripe for subscriptions.

### Intermediate Full Stack Developer

Teravision

February 2021 - June 2021

- Worked in a Scrum Team, building with Next.js the new redesigned version of a music library app. Implemented tests for every component built.

### Full Stack Developer

Freelance - Upwork

May 2020 - January 2021

- Started a React dashboard app from a template with multiple roles and permissions, a chat using socket.io and Typescript Node.js/MongoDB for the backend.
- Implemented style changes and getting content from a HeadlessCMS with GraphQL in a React app.

### Programmer

EYSS

August 2018 - April 2020

- Implemented a React web app to get cryptocurrency exchanges' transactions by API and CSV files from different exchanges to show all this data in a dashboard with tables and charts, and to make reports.
- Contributed to the development of a cryptocurrency trading terminal, creating the base React app from a plain HTML/CSS template, and connecting it to APIs, WebSockets and a Web3 Wallet as Metamask.

## Education

### Bachelor of Computer Science

Central University of Venezuela

2022
